EDUCATION

Carnegie Mellon University

M.S. in Engineering and Technology Innovation Management

Pittsburgh, PA

Dec '26 (Expected)

Indian Institute of Technology - Madras

B. Tech + M. Tech (Dual Degree) in Engineering Design (Specialized in Biomedical Design)

Chennai, India

Jul '23

PROFESSIONAL EXPERIENCE

PeerfectCV

Founder

Hyderabad, India

Feb '25 - Dec '25

Built a peer-driven resume feedback platform from problem definition to deployment and early retention.

- **Identified the gap:** jobseekers lacked structured, reciprocal feedback. Existing channels (Reddit, LinkedIn, paid services) were slow, generic, or expensive. Designed around the insight that peers, not experts, deliver the most contextual and timely feedback.
- **Shipped MVP in 6 weeks** using Firebase Auth and Google Sheets automation. Built email verification, a guided submission flow, and an automated reciprocal peer-matching engine that prioritized active reviewers.
- **Made deliberate product tradeoffs:** chose constraint over features (scoped to one problem vs. expanding into interview prep), reciprocity over payment ("give to get" mechanics vs. a paywall), and structure over freedom (guided forms vs. open text boxes).
- **Grew to 50+ users in closed beta** with 88% onboarding completion. Iterated on UX based on user behavior data; replacing open text boxes with structured forms increased actionable feedback scores by 40%.

Xion Multiventures Pvt. Ltd.

Market Strategy Analyst

Hyderabad, India

Aug '23 - Oct '24

- **Built decision frameworks under uncertainty:** synthesized macroeconomic data, supply-demand signals, and geopolitical risk to inform high-stakes commodity trading decisions on CME, Euronext, and ICE.
- Designed and implemented a risk management framework based on market volatility and supply-demand shifts, reducing potential losses by 50%.
- Conducted data analysis of currency trends and commodity imbalances to identify opportunities, improving successful trade rate by 11%.

Tvasta Manufacturing Solutions Pvt. Ltd.

Product Engineering Intern

Chennai, India

Dec '21 - Jun '22

- Managed the product lifecycle of a miniature 3D printer for paste-based materials, from design and testing to deployment, contributing to faster iteration cycles.
- Engineered a material handling system and optimized slicing parameters, delivering process improvements that increased print accuracy by 20% and reduced material waste by 15%.

Synthara AG

Market Intelligence Research Intern

Remote

Sep '20 - Nov '20

- Conducted market research to build and manage a database of 500+ investors and strategic partners in the AI chip space, contributing to successful outreach and investor engagement.
- Analyzed stakeholder profiles and funding trends to help prioritize outreach, facilitating conversations with 15 high-potential investors.

LEADERSHIP EXPERIENCE

Avishkar Hyperloop

Business Lead

Chennai, India

Aug '19 - Aug '21

- Led a 5-member team managing sponsorships, finances, PR, and social media to support India's first student Hyperloop team.
- Secured INR 4.5M in corporate sponsorships through targeted outreach and stakeholder management, contributing to the team winning the "Most Scalable Design" award at European Hyperloop Week 2021 in Spain.
